

Official Supporter Offer Proposal

ANZIIF/AiBEC Certificate and Advanced Certificate in Claims Consulting

SEPTEMBER 2025

About the Courses

We are pleased to announce the development of a NEW Insurance Industry **ANZIIF/AiBEC Certificate & Advanced Certificate in Claims Consulting** to be offered to experts, consultants and service providers working in insurance claims.

The number of expert consultants operating in the insurance sector has increased exponentially in recent years. Also, with the growing focus on improved reporting by experts and service providers, and the impending revised General Insurance Code of Practice it is timely that AiBEC and ANZIIF take the initiative and collaborate in developing qualifications directly targeting this group.

AiBEC and ANZIIF believe this joint educational piece is a major advancement in the evolution of the training and fills a hitherto gap by providing formal focused insurance qualifications for external consultants, service providers and experts working in the insurance industry. The courses will enable insurance claims consultants to gain important insights and knowledge to assist them in the performance of their responsibilities.

ANZIIF is the highly respected and leading provider in Australia of insurance focused training courses and AiBEC is the professional organisation established in 2024 to bring about improved standards in claims reporting and represent the interests of engineers and building consultants engaged in insurance.

For further information about ANZIIF [click here](#) and AiBEC [click here](#).

AiBEC and ANZIIF believe over time the qualification will be the benchmark and be seen as a minimum requirement for all claims consultants working in the insurance industry.

Course Structures

BENEFITS FOR SUPPORTERS

Organisations that become registered official supporters for the certificate and advanced certificate will be seen by others as at the forefront of promoting professional training standards for experts, service providers another consultants engaged in the insurance industry.
